WANT LISTS GROW WITH FAVORABLE PRICES

Overall Market Active At Current Trading Levels

The Market in Depth

The overall coin market continues to fluctuate on a weekly basis. One week it looks like it is faltering and the beginning of a major decline is imminent. The next week prices are more stable with activity on the rise. This is the week which shows stability, with more plus signs than minuses. Many dealers are reporting that they are not willing to sell their inventories at levels any lower than we are seeing right now. Of course, this may be true in only selected areas.

Dealers are quick to report an increase in want lists from their customers. What these want lists contain depends on your clientele. If you are a shop owner, it is a mixed bag of Type, Dollars, Gold, and Commems; Proof and Mint Sets are leading the way. However, the sale of Proof and Mint Sets are usually limited to one or two at a time. The main strength of Proof and Mint Sets seems to be a major campaign by a few selected firms. It matters little to the owners of these sets from whence the strength comes as long as prices remain exceptionally firm.

To the dealer who does business strictly out of an office and attends a coin show nearly every weekend, the stability of this market may lie in many of the same areas (Type, Dollars, Gold, and Commems), but he may be more interested in higher grade coins. Depending on the series you select, the grade will determine the strength in the marketplace compared to all other areas.

Type has an even mix of increases and decreases this week, however its main strength seems to be in 64 and better material. For the most part, where changes have not occurred in the charts, dealers are willing to pay the current Bid levels. Nonetheless, it is difficult to determine how much material is trading at these levels (in other series also) because most potential sellers are not willing to discount their inventories any further than the marketplace has dictated over the last several months. Most dealers we talk to are willing to wait for higher levels.

Dollars and Commems have improved immensely over the last few weeks; generally, the activity is taking place for MS-63 and higher grade coins. But, there are enough minus signs in both charts to let us know that there are sellers out there who are willing to participate in a two-way market. These two areas of the market seem to always garner the most interest in numismatics. Collectors in all price categories can participate and feel like they are receiving good value for their dollar.

This Week's Market

CENTS THRU HALVES: The BU roll market remains very inconsistent. One week there will be Bids on a whole slew of dates in every denomination; the very next week finds sparse Bidding and various rolls being offered at discounts. This week there are a number of plus signs, but the minuses detract from the positive. Several Mercury and Roosevelt Dime rolls have fallen along with some Washington Quarters.

DOLLARS: The Dollar market is making a strong showing this week as numerous plus signs cover the charts (mostly in MS-63, 64 & 65). There are enough minus signs to let you know that there are some occasional ready sellers at the current levels. This is important for the buyers to know since in some markets when everything is strong, it is difficult to buy anything at the then current levels. At least now they know they may be able to buy something at their Bids.

PROOF SETS AND MINT SETS: Much of the activity on the teletype circuits comes from Proof and Mint Sets. These two areas have not slowed this week as buyers remain hot in pursuit. Most of the demand remains at previous levels, although a few plus signs can be found.

COMMEMORATIVES: Silver Commems appear to be moderately healthy; there are several plus and minus signs throughout the charts, thus exhibiting a good balance of potential buying and selling. It also indicates that there are want lists to be filled by dealers for their customers. Even the Gold Commems seem to be generally steady at today's Bid levels.

TYPE: The Type charts are exhibiting more plus signs this week as dealers are trying to buy specific issues. Despite the fact that there are some minus signs in evidence, the number of declines is fewer this week.

GOLD: Minus signs outnumber pluses this week in the U.S. Gold chart. In the Mint State issues, the majority of declines are nominal as sellers are not willing to discount too heavily. A little more encouraging is the fact that most issues are steady at current Bids.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$383/$396, 1987 1oz-$385/$405, 1/2oz-$190/$216, 1988 1oz-$440/$480, 1/2oz-$186/$220, 1989 1oz-$442/$485, 1/2oz-$205/$250, 1990 1oz-$510/$585, 1/2oz-$335/$385. Proof Silver Eagles wholesale at: 1986-$16.50/$18.50, 1987-$16.50/$18.75, 1988-$78/$86, 1989-$15.50/$16.75, 1990-$24.50/$28. BU 1986 Silver Eagles trade at $12.75/$13.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc., may not have full mint lustre, may be dull toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 Choice BU Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU Far and away nicer than MS-63, yet, a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU Sharp full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag mark [illegible] may show only a slight weakness of strike. [illegible] These are well above average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must have eye appeal.*

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this box are for typical original rolls of each date and mint mark

COIN MARKET CONTINUES TO SEEK EQUILIBRIUM

"Rare" Modern Rolls to Watch

The Market in Depth

Every so often a dealer will call and deliberately pique our curiosity, sometimes with a comment, sometimes with a question. Anytime we hear the rhetorical question "Know what coin is a lot rarer than most people realize?", we brace ourselves for the answer. This was to be no exception. "The 1983 P & D Quarter rolls."

Once you get past the initial shock of someone describing such modern items as "rare", you realize how accurate that description can be. When you can't remember seeing any offered for sale, **that's rare.** When you see offers to purchase small quantities go unanswered, **that's rare.** When you see offers to buy single quarters @ $2.50 each—and they can be a little used—**that's rare.** When someone who advertises to buy 20 rolls cannot finish assembling his date sets, **that's rare.**

It's no secret that the coin market has long moved away from its roll orientation, but in the modern rush to single, "certified" items, many dealers are still doing a healthy business in wholesaling rolls. There is a simple rule involved: anyone assembling date sets needs to find roll quantities of material, and they need to find *every* roll. Ninety-nine out of a hundred just won't do.

If the Treasury chooses not to release certain dates, or they are released partially or regionally, a nightmare can be created. Even if the items are released, you still need a dealer or collector who has put aside a quantity of rolls—and how many of those customers do you have? Hopefully, enough, or you can imagine the money that the wholesaler can tie-up in inventory while waiting to buy what should be a cheap item. In fact, it might be easier to assemble a group of a rarer, more valuable coins; we all know there is real value in a roll of Unc. Indian Cents, but who would have guessed about 83 P&D, 84 P&D, or 85 P&D Quarters, or some of the 82-86 Dimes?

Now we would be the last to recommend the purchase of modern coin rolls for future profits, although somebody with the right luck or skill could definitely make some money at this. You can't beat the purchase price, and with an easy "liquidation" feature about the only expense is the "carrying cost". Within a few years, you should begin to get an indication of which rolls can be safely spent (although the rarity of the '83s didn't become evident until 1989).

Dealers who don't normally follow the roll market should still pay occasional attention to Roll prices; you never know what is going to walk through the door. It just might be a "fortune" in "worthless" coins.

This Week's Market

CENTS THRU HALVES: This week finds the BU roll market considerably more active than in recent weeks. Lincoln Cents, Jefferson Nickels, and Franklin Halves are all receiving solid Bids at the current levels. Almost as positive is the certainty that the Roosevelt and Washington series are not exhibiting minuses this week. Some dealers report that they are selling sets to their customers due to the fact that they can be had so inexpensively.

DOLLARS: If the overall market is indecisive as to its near-term direction, then the Dollar market is bucking the trend. There is solid support for the majority of issues in MS-63, 64, & 65. The number of plus signs far outnumbers the minuses as dealers try to fill want lists. Even the few discounted sellers seem to be satisfied with the amount of activity in this series.

PROOF SETS AND MINT SETS: Proof Sets continue to lead the way for the active shops in the country. Nearly every issue from 1960 to date is wanted at the current levels. Mint Sets remain energetic at the present levels although there are no plus signs this week.

COMMEMORATIVES: While the Commem market does not appear to be all that robust at this time, there is significant activity at today's levels. The balance between supply and demand seems adequate in that, if a discount seller appears on the market, most of the time his coins sell quickly.

TYPE: The Type market is mostly status quo; however, the majority of changes are to the downside. Many dealers feel that this is a good time to sit on the sidelines and wait to see what is going to happen in the next couple of months.

GOLD: The U.S. Gold chart displays a variety of plus signs in the Mint State columns. It seems like the week after minus signs are prevalent, plus signs pop up. It must be that the minuses create reasonable buying opportunities for those dealers with a little extra cash in the bank.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$378/$392, 1987 1oz-$380/$401, 1/2oz-$188/$214, 1988 1oz-$440/$475, 1/2oz-$184/$220, 1989 1oz-$440/$480, 1/2oz-$205/$250, 1990 1oz-$505/$580, 1/2oz-$330/$385. Proof Silver Eagles wholesale at: 1986-$16/$18.50, 1987-$16.50/$19, 1988-$80/$87, 1989-$15.50/$17.50, 1990-$24.25/$27. BU 1986 Silver Eagles are trading at $12.75/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre may be dull, toned, or spotted May be the worst possible example but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65 Few contact marks in field, only minor marks on main devices Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-6S singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

FTC'S CUTLER WARNS COIN INDUSTRY: SERIOUS PROBLEMS REMAIN UNADDRESSED

Neither a government-affiliated "self-regulatory organization" nor an industry-run watchdog group is the perfect solution to combatting fraud in the rare coin industry, said Barry J. Cutler, Director of the Federal Trade Commission's Bureau of Consumer Protection, in remarks before the Industry Council for Tangible Assets in Washington, D.C. today. Rather, Cutler challenged the industry leaders who have been considering alternatives for self-regulation to go beyond the rhetoric and commit themselves to true consumer protection for rare coin investors and collectors alike.

Cutler cited the annual Salomon Brothers Report, a comparison of investment options used by telemarketers and others to make lavish investment claims about rare coins, as an example of the industry's lost opportunities to take decisive action to protect unwary investors.

"Is there anyone in this room who does not agree that the Report has been a major selling point for virtually every telemarketer?" Cutler asked. "If the leaders in numismatics today are unwilling or unable to prevent unwarranted consumer reliance on such rosy investment claims, what hope can rare coin dealers realistically have for the idea that the industry alone can do the job of self-regulation without a self-regulatory organization (SRO) or other government involvement?"

The FTC has challenged one rare coin dealer who used the Report to market coins that had little in common with the truly scarce and rare coins used to base the Salomon Brothers Report. Cutler noted that previous Salomon Brothers surveys had been used in fraudulent schemes to market investment-grade diamonds, as well.

Investment fraud has not abated since it was first called to the attention of industry leaders last year, Cutler said, and he challenged the audience to educate the public and take behind-the-scenes action to prevent the pitfalls awaiting consumers who rely on the Salomon Brothers Report and other indices to project appreciation for rare coins.

Cutler doubted that industry proposals for a formal SRO would be the panacea claimed by some of its supporters. At the same time, he said, industry self-regulation by itself may be insufficient to solve the fraud problem. "The industry has offered much talk, but little action, about self-regulation in the five years since the FTC became very active in the coin industry," he said.

"Industry leaders agree on what they do not want -- government regulation," Cutler continued. "What I see lacking is any genuine commitment to what industry leaders say they do want -- true consumer protection for investors and hobbyists alike.

"The next few months...will give your industry an opportunity to convince the government and the consuming public that you really mean business this time," Cutler said.

Our 29th year...

SELECTED ISSUES STILL RISING

It Takes Visible Demand To Move Market

The Market in Depth

It was an illuminating conversation. An old dealer friend called to chat, and mentioned that he thought that current Bid levels were too low: "Take coin X; I'd pay 20% more than that right now!" To our standard reply to such statements ("O.K., so where's your Bid?"), he answered that he had stopped Bidding some time back because he thought that prices were too high.

Fortunately he was an old friend, so we immediately dismissed any thought of strangulation; it was just a momentary temptation anyway. It did set us to thinking, though, about how many dealers there may be who think (or act) like him. Now, don't misunderstand us. There is nothing "wrong" with anyone withdrawing Bids because they feel that the market is too high; that is a reasonable business decision, the correctness of which will be decided by future market activity. Besides, if enough dealers do it, their judgment is confirmed by the self-fulfilling prophecy. But to then complain that Bids are too low and be unwilling to do anything about it!

The Greysheet reports on the national coin market, and in a perfect world, that would mean that we are receiving demand information from every active dealer in the nation. Unfortunately, we simply aren't. Some dealers prefer not to tip their hands on any prices, and some don't even want competitors to know in which items they are currently interested.

Making your demands known is critically important in the coin market, where you have so many items available, and a relatively small supply of dealers with limited liquidity to cover the entire market. There are many ways to let your demand be known – several electronic systems, advertisements, fliers to pass out at coin shows, even FAX "Buying" messages. If your information is out there for other dealers to see, chances are that we will see it. If you are FAXing to just a handful of associates, FAX us a copy of your current active Bids. You may be "the market" on just ten coins, but if you don't let us or your associates know, the market may be reported at lower levels than is reasonable.

Anyone who thinks coins are too low and does nothing to raise Bid is helping to deflate the market, and should not complain that prices are too low. Anyone who is the high Bidder, even on one coin, is part of the process that will ultimately raise prices. After all, coins are only worth what the forces of supply and demand think that they are worth, and in pragmatic terms that means visible supply and demand.

This Week's Market

CENTS THRU HALVES: The BU roll market is mostly steady with the exception of dime rolls. There is a lengthy list of adjustments in the Mercury Dime column as sellers are more prevalent than buyers. Even the Roosevelt series is showing some signs of weakness due to lower sells. The Franklin series is especially strong at current levels.

DOLLARS: Dollars are about as healthy as any series could be expected at this time. More plus signs than minuses are exhibited in the columns for MS-63, 64 & 65 issues. Many of the dealers we speak with have commented that their customers nearly always have Dollars on their want lists. Obviously, some issues are more desirable than others depending on availability in grade, need, and current Bid levels.

PROOF SETS AND MINT SETS: These two areas are about as active as we have ever seen them at this time of the year. Usually the most active time of the year for Proof and Mint Sets is in November and December for the holidays. Nearly every issue in both charts is wanted at current Bids.

COMMEMORATIVES: The Silver Commem market is generally mixed this week as buyers and sellers try to get together at favorable levels. There is a good mixture of increases and decreases to help balance the series. Gold Commems still seem to be a little soft as discounted sellers are more visible than Bid buyers.

TYPE: This week finds Type coins succinctly steadier than in recent weeks. There are the few occasional minus signs, however, we are finding more dealers trying to buy specific issues at the current Bid levels. Central States should help determine if this trend will hold or not.

GOLD: In Mint State Gold, the chart displays several increases this week as dealers move into areas which they feel are appropriately priced in relation to availability. Common circulated issues seem to lack real demand at the previous Bid levels.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1oz-$381/$395, 1987 1oz-$383/$404, 1/2oz-$189/$215, 1988 1oz-$440/$475, 1/2oz-$185/$220, 1989 1oz-$440/$480, 1/2oz-$205/$250, 1990 1oz-$505/$575, 1/2oz-$330/$385. Proof Silver Eagles are trading at: 1986-$16/$18.25, 1987-$16.25/$19, 1988-$79/$87, 1989-$15.25/$17.25, 1990-$24/$27. BU 1986 Silver Eagles trade at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

COLLECTOR'S MARKET AT CENTRAL STATES

Activity Highest Below $2,000 Barrier

The Market in Depth

The Central States Convention in St. Louis proved active for many dealers, despite the recent trend toward lower levels in the overall marketplace. Several dealers in attendance continued to voice the opinion that **sight-unseen** Bidding is still forcing the market downward, but it was rather obvious to most dealers that coins which met the buyer's grading standards were trading at current levels. The grade on the slab didn't mean much to the dealer who didn't like the look of the coin being offered. Of course, this means that coins were changing hands on a sight-seen basis, just like the "good-old days". And who can complain about healthy activity that gets coins out of inventory made more stagnant by the low level of many **sight-unseen** Bids?

There remains the question of what the market will do with the unattractive (or low-end) coins which have helped drive the **sight-unseen** Bids downward. PCGS & NGC have bought-back some of the worst examples, but in a down market, **sight-unseen** Bids really do represent a "worst-case" scenario. These "unwanted" coins may be tradable, but at lower levels than those indicated. Since these are the "problem" coins that tend to linger in inventory, they remain a serious challenge to the long-term success of the **sight-unseen** trading systems. This can benefit the customers, since they buy coins on a sight-seen basis anyway; if the coin is ugly, it either gets purchased at a lower level or it sits in stock. A coin that remains in stock long enough is liable to get "blown-off" to the highest **sight-unseen** Bidder, who accordingly structures his Bid to account for the worst-possible example that he has ever seen.

However, many collectors fail to understand this logic, so they mistake **sight-unseen** Bids for "value", especially when purchasing nicer-looking coins. **Sight-unseen Bids do not represent value for coins which are collected on the basis of their eye appeal.** Bids may equal value over the short-term in a rising market, but that cannot be sustained. Sight-seen coins must always be worth more than **sight-unseen.**

Sight-seen was definitely the theme at Central States, with most dealers reporting that collector coins were at the top of most want lists. Buyers were willing to pay current Bids (at a minimum) for coins that they liked. Topping the Want Lists were MS63 & MS64 Silver Commems, the a-little-better-than-common Silver Dollars in MS63 & MS64, and early type coins in MS64 and below. Barber coinage was especially active depending upon specific needs by date and grade (although some of the common issues show lessened demand by date). Many dealers reported that such coins priced below $2,000 were readily salable, while the higher priced coins were meeting resistance.

This Week's Market

CENTS THRU HALVES: Even where Bidding activity is not apparent, many of the dealers who participate in the BU roll market are finding it difficult to locate specific issues. Sure, there are occasional discounted rolls available, but if these are not on your want lists, then they may remain unsold. However, the first sign that there is a need by another dealer and the price goes up dramatically.

DOLLARS: The Dollar market is about as steady as it can be without making across-the-board advances. Nearly every issue in MS-63, 64 & 65 is in demand at the current Bid levels. While there are a few minus signs here and there, most of the declines are nominal to say the least. Central States served to reinforce the fact that several dealers are in the hunt for the more elusive issues in high grades for their customers. Competition is fierce enough that, even with an established Bid, when the right coin comes along, buyers are willing to pay well in excess of the reported Bid.

PROOF SETS AND MINT SETS: Proof and Mint Sets remain blazing hot. The lack of plus signs is not an indication of lethargy. Nearly every issue is still wanted at current levels. It just seems like most dealers are trying to buy without raising Bids.

COMMEMORATIVES: There are few changes this week in the Commem charts. Central States found most dealers who buy Commems on a consistent basis, more than willing to pay the current levels for coins which they knew would meet the desires of their customers. Many dealers report that they feel the Commem market is at opportunistic levels, especially where upper-end Mint State coins are Bid less than 100% over the XF/AU or MS-60 issues. The premiums for better quality are quite reasonable.

TYPE: The Type market appears to be coming around slightly. Many dealers were looking for accurately graded coins at current levels at the Central States Convention. Thus, Bids remain generally stable, with just a modest number of increases. More importantly, the number of discounted issues is down this week.

GOLD: The U.S. Gold chart indicates that this area is still slightly soft. However, what you cannot see from the changes in the chart is that coins are trading rather briskly at these new levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$384/$398, 1987 1oz-$386/$407, 1/2oz-$190/$215, 1988 1oz-$440/$475, 1/2oz-$185/$220, 1989 1oz-$440/$480, 1/2oz-$207/$250, 1990 1oz-$510/$573, 1/2oz-$325/$380. Proof Silver Eagles wholesale at: 1986-$16/$18.50, 1987-$16.50/$19, 1988-$80/$88, 1989-$15.50/$17.75, 1990-$24.50/$28. BU 1986 Silver Eagles trade at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market. such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-64 and MS-65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

LONG BEACH TO SET MARKET PACE

Silver Commems Define One Collecting Strategy

The Market in Depth

Remember the 'good old days' (was that 2 or 4 years ago?) of 'collector' coins? Silver Commemoratives are still favorites; comparing bids with late May of 87 & 89:

50 Piece Set:	MS60	MS63	MS64	MS65
May 1987	$10,750	$19,965	$33,495	$ 77,395
May 1989	$ 9,778	$17,873	$48,986	$161,220
May 1991	$ 8,015	$13,987	$25,254	$ 73,565
% Change, 87-89	-9%	-10%	+46%	+108%
% Change, 89-91	-18%	-21%	-48%	-54%
144 Piece Set:	**MS60**	**MS63**	**MS64**	**MS65**
May 1987	$24,432	$40,819	$69,695	$155,120
May 1989	$22,159	$36,000	$90,118	$292,445
May 1991	$18,335	$27,852	$46,417	$131,430
% Change, 87-89	-9%	-12%	+29%	+88%
% Change, 89-91	-17%	-22%	-48%	-55%

For many years, coin buying has been focused on quality. "Buy the best; the lowest supply generates the greatest demand." Collectors had to purchase MS65s to be considered "serious". Many couldn't afford this, or preferred MS63s at a fraction of the price (there are very pretty MS63s out there at reasonable prices for completing sets!). It's not hard to tell which strategy provided buyers with the greater profits between 1987-1989, and which the greater protection between 1989-1991.

When this market turns around, higher grades may again skyrocket – it wouldn't be the first time – and determine whether current price levels represent a wonderful buying opportunity. The price spreads between adjacent grades for specific issues also have implications for purchasing decisions: There are still many issues where a higher grade can be purchased for very little additional money (i.e. XF/AU Bid and MS60 Bid). While the MS64 to MS65 spread is still considerable (averaging 180%), even here there are exceptions (Columbia Type and Norfolk among others).

Long Beach provides a magnet for auction activity, with Superior offering their May 27, 28, 1991 Auction featuring An Amazing Collection of United States Silver Dollars, a May 29 Session of World Coins, and the Irving Goodman Collection of Chinese Coinage on June 3 & 4. Heritage Numismatic Auctions will offer their May-June 1991 Long Beach Sale (May 29-June 1) and one of their Bullet Auctions (certified only) on May 30 at Long Beach.

This Week's Market

CENTS THRU HALVES: This week finds the BU roll market generally mixed as various issues seek new levels. The area with the most changes happens to be the Walking Liberty chart. From 1940 to 1947, nearly every roll has adjusted downward. On the other hand, Franklin rolls are in strong demand at current levels.

DOLLARS: Quite a bit of activity in the Dollar market keeps this series at the forefront of numismatics these days. Even though you will find several minus signs in the charts this week, the bottom line is that coins are trading at these levels. As long as there are coins trading within a series, it is rather difficult to complain. The real problem occurs when a series is not trading at all.

PROOF SETS AND MINT SETS: The Proof Set chart indicates that the flame is still burning. Numerous plus signs are scattered throughout these columns as dealers continue to advance their buy prices for particular issues. Mint Sets do not show nearly as many increases, however, they remain as steady as they have been in recent weeks.

COMMEMORATIVES: Silver Commems are not demonstrating any signs of future advancements. Nonetheless, despite the increasing number of declines in various Bid levels, this area seems to be trading actively. Someone must feel that prices are reasonable or they would not be trading at all. Even Gold Commems are finding some transactions taking place. As we pointed out in **The Market in Depth** article, prices have dropped dramatically over the last couple of years.

TYPE: As we mentioned last week, the Type market appears to be substantially firmer. The number of minus signs is down drastically, and advances are on the rise. It may not be a landslide of increases, but to the dealer who is heavy in Type coins, it is a positive step. Type dealers are hopeful that this trend continues at Long Beach.

GOLD: Numerous minus signs cover the U.S. Gold chart this week. Many dealers are using this series to increase their cash flow which results in a general lowering of Bid levels. As more sellers appear, the usually steady buyers lower their Bids in order to take advantage of this sell-off. There seems to be a large supply of certain issues on the market at this time.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$375/$393, 1987 1oz-$379/$402, 1/2oz-$190/$210, 1988 1oz-$438/$480, 1/2oz-$193/$220, 1989 1oz-$438/$485, 1/2oz-$218/$250, 1990 1oz-$558/$600, 1/2oz-$340/$380. Proof Silver Eagles trade at: 1986-$17/$18, 1987-$17/$18.25, 1988-$83/$86, 1989-$15.50/$17, 1990-$25/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre may be dull, toned or spotted May be the worst possible example, but shows no wear or damage

MS 63 - Choice BU - Brilliant Unc (may exhibit some toning but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

DEALERS DESCENDING ON LONG BEACH

Collectors Always Able to Generate Demand

The Market in Depth

There's something about June that makes the grass seem greener and the birds sing sweeter... it must be Long Beach time. With springtime's annual migration of dealers to the West Coast, it is always instructive to look at the market activity resulting from the Long Beach Show. Few dealers will deny that many prices are down, that money is tight, and that the hobby/industry is suffering from a lack of new blood (and new money). It is an unpleasant fact of numismatic life that this market slowdown has forced some dealers out of business already, and may still harm others.

Yet, when you walk the Long Beach bourse, you will certainly find many dealers who are very busy and fairly happy. Are these contrarians who have discovered the next wave of numismatic interest? Probably not; they are more-likely the 'old-timers' who have long specialized in supplying collectors with coins. Many of them are long-time Long Beach hands, and many see the same customers Long Beach after Long Beach.

For these dealers and customers, Long Beach is a lot like the old-fashioned kind of coin shop. The collector developed a working relationship with the dealer, and would periodically visit the shop to inspect the wares. With dealers setting up in the same locations at Long Beach, the collectors know where to find their old friends. Many collectors save up their allocated funds for these excursions, visit the same dealers, and come home with some nice EF/AU coins and some MS memories.

Sure, this is a far cry from the scenario of dealers marketing $20,000+ coins to Wall Street or assembling million dollar portfolios; you won't find that many *high-grade & rare* coins at these tables. But you will find happy customers who enjoy both their hobby and their numismatic acquaintances, and whose demand for coins still forms the backbone of the hobby. And for the new generation of dealers, providing customers with nice coins at appropriate prices sounds a lot like the way the coin business used to be done.

Highlights from the "Amazing Collection of United States Silver Dollars" in Superior Galleries' May 27, 28 Auction: 1776 Continental Dollar MS65, 39,600; 1794 Flowing Hair Dollar (B-1) MS65, $506,000; 1803 Draped Bust Dollar PR66, $264,000.

This Week's Market

CENTS THRU HALVES: The BU roll market was somewhat quiet this past week as many dealers were readying for the Long Beach Show. However, the Franklin series remains active with most dates wanted at current levels; even a few advances were registered. The few declines found were a result of discounted offers to sell.
DOLLARS: There was not as much activity last week in the Dollar series as there had been over the last several weeks. Although many dealers report that they still have unfilled want lists that they plan on trying to fill at Long Beach. Despite the smaller number of changes in the MS-63, 64 & 65 columns, this area remains hearty.
PROOF SETS AND MINT SETS: This seems to have been a mild week for most dealers across the country as Proof and Mint Sets did not show a massive number of advances. Yet, the majority of sets are still in demand at current Bid levels.
COMMEMORATIVES: Silver Commems suffered an unusual number of declines this week as sellers are willing to discount various issues. Commem experts seem to be at a loss as to how much lower some of the inexpensive issues can fall. It may be a matter of the collectors having already acquired these more common issues and the ones which remain in dealer inventories are causing the market to fall further.
TYPE: The Type market is beginning to show an increase in activity—and mostly at higher levels. The few minus signs are clearly overshadowed by the larger number of advances. Judging by the number of changes in the 63 & 64 columns, it appears that most want lists contain issues which are priced at under $2500. Dealers report that they are having a difficult time selling coins whose value is over $5,000.
GOLD: Very few changes can be found in the Gold chart this week as dealers were content with current levels. Practically all of the Bidding activity we monitored was at the current Bid levels. Long Beach may prove which direction this area is headed.
EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$373/$390, 1987 1oz-$385/$403, 1/2oz-$185/$210, 1988 1oz-$440/$480, 1/2oz-$197/$220, 1989 1oz-$440/$480, 1/2oz-$220/$250, 1990 1oz-$558/$598, 1/2oz-$340/$390. Proof Silver Eagles trade at: 1986-$16.75/$18, 1987-$17/$18.50, 1988-$81/$86, 1989-$15.25/$17, 1990-$25/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 · Unc.,may not have full mint lustre may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage

MS-63 · **Choice BU** · Brilliant Unc (may exhibit some toning but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike Above average coins

MS-64 · **Distinct BU** ·Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible

MS-65 · **Gem BU** ·Sharp, full strike NO major distractions in field or on main devices Attractive toning permissible A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum $20,000)

What's in it for us?

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well [illegible] average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of [illegible] mirror prooflike surfaces on both sides.

HAPPY BUYERS AT LONG BEACH

Turning Coins Keeps Market Dynamic

The Market in Depth

Sometimes it is difficult to summarize the coin market in just a few words, but one of the dealers on the Long Beach bourse came close. This dealer, who just one year ago was advertising as one of the largest certified dealers, gave us his "secret" for surviving in this slower market: "I'm turning lots of little coins to lots of customers for lots of little profits." There's lots of wisdom in that approach.

Coin dealers seldom lose money by taking a profit, as long as their carrying charges and overhead are kept in line. One of the disadvantages of an inventory-based business, however, is that there is always the temptation to try to get "more" for the coin. The question "Why sell it at this show for $750 if next week I might be able to get $825?" has much validity in a rapidly rising market, which coins witness on irregular occasions. But in a down market, smaller profits may become more attractive; even profits based on replacement cost instead of original purchase price.

Another dealer, when asked his formula for success in this market, picked up on a theme that we have developed here before. By drastically reducing his inventory, he has eliminated a great deal of his overhead; by acting more as an agent for his customers instead of a warehouse, he was able to operate profitably. While we certainly understand this approach, and have even recommended it at times, it does present one problem for the market. If most dealers react to a "down" (**read** abundant supply, insufficient demand) market by reducing their inventories (**read** putting even more supply into the marketplace), won't this exacerbate the price declines?

This observation led to an interesting discussion on the question of timing, especially the advantages of liquidating "excess" inventory as quickly as possible if the market starts to turn. Judging by some of the volatility in the marketplace that we have seen, more than a few dealers follow this approach. But, and it is a big BUT, there are also many dealers who anticipate such actions and hoard their cash during boom times in expectation of being able to make some spectacular purchases later on. Either philosophy has merit, and the ultimate winners are determined by just how quickly the market drops, how far it drops, and how quickly and abundantly it recovers.

During the Long Beach Show, and the surrounding auctions, millions upon million of dollars in rare coins changed hands. That means that there was a seller willing to sell, and a buyer willing to buy. As long as the coins keep turning, price levels will ultimately sort themselves out, and the market will be ready to enter its next phase.

This Week's Market

CENTS THRU HALVES: Even though the BU roll market has experienced some declines (mostly in the Roosevelt and Washington series) over the past few weeks, overall, this has to be the most productive this market has been in a very long time. Part of the reason for this is that most dealers refuse to sell original rolls at these current levels. So, when dealers need specific dates for their customers, they usually have to pay more. In the meantime, the dealers who support this market, continue to run their Bids at the current levels for a majority of the rolls.

DOLLARS: Dollars remain high on want lists. Dealers were trying to buy most dates at current levels at the recent Long Beach Show. Of course, they were finding it difficult to pry the better dates away from other dealers unless they were willing to pay in advance of Bids. As you can see in the charts, some issues suffered setbacks as various dates were readily available at previous levels.

PROOF SETS AND MINT SETS: Proof Sets are very steady with several increases this week. The high Bidders keep the pressure on. Activity in Mint Sets has dropped off slightly as numerous late-date sets show declines.

COMMEMORATIVES: Silver Commems have fewer declines this week than in recent weeks. Most of the activity we have monitored of late is taking place at current levels. Even the Gold issues are starting to show some life; a few plus signs have crept into the chart.

TYPE: Although Type coins do not indicate a lot of activity in the charts, many dealers have been trying to buy certain issues at the current Bids. Most sellers have not been overly excited about letting go of their choice material unless the offers are at premiums to Bid.

GOLD: The U.S. Gold market seems to lack lustre at this time. Although there are buyers for many issues at the current Bids, we are not finding too many marketmakers willing to increase their buy prices for the majority of issues.

EAGLES: American Proof Gold Eagles are trading at 1986 1oz-$376/$391, 1987 1oz-$380/$405, 1/2oz-$185/$212, 1988 1oz-$440/$480, 1/2oz-$196/$216, 1989 1oz-$442/$482, 1/2oz-$222/$250, 1990 1oz-$559/$598, 1/2oz-$340/$390. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$16.50/$18, 1988-$80/$87, 1989-$15.50/$16.50, 1990-$24/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider ectivity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs ettendent to certificetion for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current merket conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you mey buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc., may not have full mint lustre, may be dull toned or spotted. May be the worst possible example but shows no wear or damage

MS-63 - **Choice BU** - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - **Distinct BU** - Far and away nicer than MS-63, yet a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - **Gem BU** - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-63 CHOICE UNCIRCULATED: Will have [illegible] bag marks; may show only a slight weakness [illegible] These are [illegible] average coins.

MS-64: Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED): Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE): Will exhibit the same characteristics as the MS-63 but with the additional feature of [illegible] mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for 8[illegible] in this chart are for typical original rolls of each date and mint mark

PROOF & MINT SETS REMAIN ACTIVE

Usual Summer Slowdown Evident

The Market in Depth

It has never been a secret that most summers are a slow period for many of America's coin dealers, and this summer of this slow year threatens to be a sleeper. Despite the general lethargy that many dealers are predicting, there are some highlights to be anticipated. There are a few major auctions upcoming, and there is always the excitement of ANA and the surrounding auction events. With collectors making a strong showing at Long Beach, dealers who bring the right inventory to Chicago can expect to have an active ANA. And while we don't doubt that the market has been cool for many dealers, there is plenty of supply meeting plenty of demand on the auction block.

The areas of greatest teletype activity remain Proof Sets and Mint Sets. These have been on the minds of many dealers lately, as they await a final determination from the Mint on the question of the Bulk Sales of Mint products. Dealers have been expressing a great deal of antagonism towards the Mint lately (see our Monthly Summary article of November 1990). One thing is certain – considering the general popularity of Proof and Mint Sets (and the important role that they play for bringing new collectors into numismatics), it behooves the Mint to work more closely with the dealer and the collector community, and vice versa. This is one more arena for the dealer organizations to establish the necessity of concerted action.

Since the beginning of the year, some of the later date Proof Sets have registered astonishing increases. Only by an enthusiastic stretch of the definition could any of these items be considered rare, but supply only has to be inadequate for current demand to force price increases. There has been some grumbling that much of the demand in this area has been coming from just a few dealers, but it becomes obvious that an increase of this magnitude and duration means substantial money is behind it. The trick to getting more people interested in numismatics is to spread good products out there – these Proof Sets are items that can be marketed to a much larger audience looking for high quality at still reasonable prices.

This Week's Market

CENTS THRU HALVES: Common BU rolls of Mercury Dimes and Walking Liberty Halves have undergone further downward adjustments due to high-grade singles falling to lower Bid levels. For original rolls to command higher prices, they would have to contain coins which were considered better than MS-65s. Several Roosevelt Dime rolls have been discounted this week, thus establishing lower Bids. There are, however, several Lincoln and Jefferson rolls on want lists at higher Bids.

DOLLARS: Dollars are quite steady this week with the MS-63 column showing the most positive increases. While the MS-64 & 65 columns are not as crowded with changes, they are also solid at current Bid levels. It seems like many collectors are in the market for specific dates at the current Bids, which appear reasonable when compared to previous higher prices.

PROOF SETS AND MINT SETS: These two charts do not have the long list of increases this week that has been characteristic the last several months. Nonetheless, the majority of sets are steady at these levels. Discounting has not been apparent as of yet.

COMMEMORATIVES: The Silver Commem market is a lot more solid this week as several issues are showing higher Bids. Even the issues with no visible changes are in demand at the current Bid levels. As we have mentioned recently, the spreads between the grades make many of the higher grade specimens much more attractive at the current levels.

TYPE: The Type charts are evenly mixed with pluses and minuses this week, although the number of changes is moderately insignificant. There are several dealers in the market for various issues at the current levels. Yet, many dealers are waiting to see what takes place over the next few weeks before they commit themselves to higher Bids.

GOLD: As of this writing, gold bullion has advanced considerably over last week's listed price. Most dealers are anxious to see if this can hold; they have seen the bull gather steam before, only to peter out very quickly.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$385/$395, 1987 1oz-$391/$405, 1/2oz-$195/$205, 1988 1oz-$440/$470, 1/2oz-$197/$215, 1989 1oz-$442/$472, 1/2oz-$222/$250, 1990 1oz-$560/$590, 1/2oz-$350/$390. The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

[illegible]

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

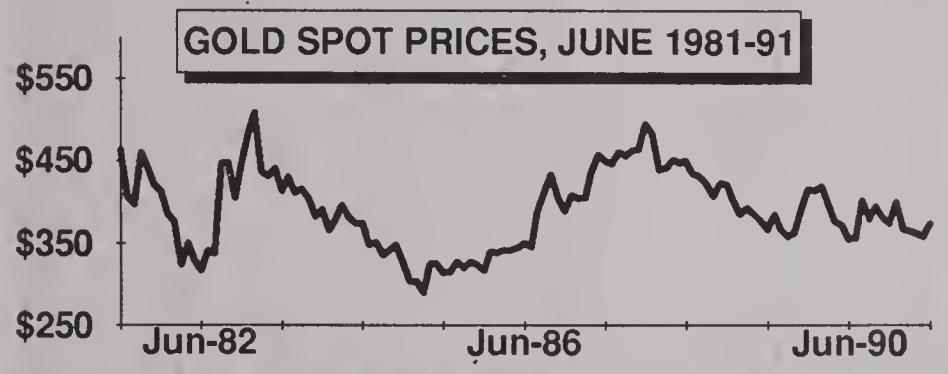
BULLION STILL IMPACTS COIN DEALERS



Most Dealers Offer More Than Rare Coins

The Market in Depth

Every so often we are asked to quantify the dollar volume size of the U.S. rare coin market. Although we prefer not to answer a question with a question, we have to ask for their definitions of "rare coin," "coin dealer," and "rare coin market." Is a wholesaler handling $100 million annually in gold bar transactions a part of the rare coin market? How about $100 million in bullion coins (or modern U.S. Treasury coins)? How do you count local coin shops that do 30% of its business in modern bullion issues?

Only one aspect of the question is certain. Virtually every coin dealer is impacted in some way by the spot price of gold. Even the dealer who deliberately avoids bullion is still likely to handle the bullion needs of his good customers rather than risk sending them to a competitor, and at some point is also likely to be asked his opinion on future direction. The short-term effects of spot on bullion inventories are obvious, while the long-term effects on the coin market and market psychology are much more difficult to quantify.

It is difficult enough to predict the future values of rare coins, but when you blend in the uncertain influence of spot on the numismatic market, prognostication becomes really difficult. And even hindsight doesn't always help. Coin dealers may prefer not to be bullion specialists, but as long as they remain the most visible source for the local buying and selling of bullion, the impact will continue to be felt.

This Week's Market

CENTS THRU HALVES: The BU roll market continues to find buyers (at Bid levels) for a bulk of the issues. This week, a few of the Jefferson Nickel rolls have advanced due to higher Bidding pressure. Also, Franklin Halves remain in robust demand at current levels.

DOLLARS: While all other series proceed through the ups and downs of market cycles, the Dollar series is the one area which seems to hold up the best. It is the one major series which has a significant enough following, despite the occurrence of temporary downturns, that will still maintain active trading throughout all market conditions. Whether dealers think that Dollars are too high or too low, this market will trade at whatever levels which dealers feel most comfortable.

PROOF SETS AND MINT SETS: Another round of plus signs can be found in the Proof Set chart. Demand may be limited to a few potent buyers, but the fact remains that they will pay these new, higher levels. Mint Sets are steady with a few increases and a nearly equal number of decreases.

COMMEMORATIVES: The Commem market remains lethargic at best. There are so many active buyers of Silver Commems that it makes you wonder how some of these issues can continue to fall as they have over the last few weeks. The answer must be that dealers have a ready supply which they are willing to discount. Furthermore, these are the very same issues which collectors have already accumulated.

TYPE: Type coins appear to be steady at today's levels; there is not much movement in either direction. Most dealers tell us that they cannot find much in the way of fresh, or nice material. Translating this – nice coins are difficult to purchase unless you are willing to pay well-over the current levels.

GOLD: The U.S. Gold chart shows a surprising number of increases this week as several dealers are in the market for specific coins and are willing to pay more to get them. Many dealers tell us that they feel the gold market is at a level of minimum exposure.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$379/$388, 1987 1oz-$385/$398, 1/2oz-$192/$202, 1988 1oz-$440/$465, 1/2oz-$196/$210, 1989 1oz-$445/$470, 1/2oz-$227/$250, 1990 1oz-$565/$595, 1/2oz-$350/$390. Proof Silver Eagles are trading at: 1986-$16/$18.25, 1987-$16.50/$18.75, 1988-$80/$87, 1989-$15.25/$17.50, 1990-$24.50/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example but shows no wear or damage

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 [illegible] Strictly Uncirculated [illegible] However no [illegible] are necessary. It will be bag [illegible] struck may not have [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must* have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

MARKET SHOWS SELECTED ACTIVITY
AUCTIONS CONTINUE STRONG

The Market in Depth

While many wholesale dealers continue to complain of lower levels of activity, there are at least two bright spots in the market. Dealers who spent years serving and developing their retail clientele now find that they are reaping the rewards of their efforts; business may have dropped off a bit, but they are still servicing their customers. Customers who have been in the coin market for many years understand the cyclical nature of the business, and they are taking advantage of currently depressed prices to make astute purchases. While they may profit from intelligent purchasing now, their rewards are more likely to come from the joy of being able to obtain a much coveted specimen, perhaps even previously unavailable, at a reasonable price.

Such contrarian buying has long been a feature of the coin market, and even longer in the stock market. Any item that evidences pricing cycles can be the source of great rewards for the clever buyer. What sets coins apart from the crowd of other investment areas is that it provides a much greater education in art, history, economics and a host of other disciplines to anyone who shares even a little curiosity about these wonderful pieces of history. The pure investor, who may never get "attached" to his coins, will find it relatively easy to sell and take his profit or loss. The collector, who takes pride in having owned a piece of history, may find it hard to take even an enormous profit, just because he doesn't want to part with his treasures. These are the customers that dealers depend upon in hard times.

Auctions also remain an active area in the marketplace, and the more that they offer "collector" coins, the happier everyone seems to be. Stack's has just concluded their $2.4 million+ June Sale, and they report continued strong interest in the classic coins, with no diminution of interest for "non-slabbed" specimens. Bidding was especially strong for rarer dates in gold. Among the highlights:

Issue	Cataloguer's Grade	Price Realized
1914-D Lincoln	BU	$ 1,485
1937-D Buffalo, 3-leg	BU	$ 1,760
1841 Quarter	Ch. BU	$ 3,960
1909 $2.5	Matte Proof	$ 8,250
1879 $4 Stella, FH	Impaired Proof	$30,800
1916-S $5	Ch. BU	$10,450
1881 $20	Ch. Br Proof	$28,600
1848 $2.5 CAL	VG	$ 3,960

This Week's Market

CENTS THRU HALVES: There is not much new to report in the BU roll market. Many rolls are steady at the current levels, while a few issues are testing new lows. The number of active sellers is very small compared to the actual quantity of BU rolls listed within each and every series.

DOLLARS: Numerous want lists keep the Dollar market at the "top of the heap". A few plus signs in the MS-63, 64 & 65 columns suggest aspirations of high Bidders to acquire certain issues if and when they become available. However, for the most part, dealers are trying to buy coins at previous levels without raising the Bids.

PROOF SETS AND MINT SETS: Proof Sets are not exhibiting the large number of increases which had been observed the last couple of months. In fact, there are a few minus signs this week indicating a certain amount of weakness in some issues. On the other hand, Mint Sets, which did not increase at the same rate as Proof Sets over this period, are steady at current Bids.

COMMEMORATIVES: The Silver Commem market seems to be on firmer ground this week as many more issues are in demand at today's Bid levels. A few plus signs here and there indicate that active buyers are willing to pay a little in advance of Bid in order to get properly graded coins which they need for their customers.

TYPE: The Type charts are slightly more operative this week. Changes appear to reveal a healthy mix of increases and decreases as various dealers try to balance their inventories; getting rid of coins they do not need for clients, while trying to obtain coins in which they have a need.

GOLD: Nominally active best describes the U.S. Gold chart this week. Most changes are to the downside, yet, they are just scarcely depressed. Many of the remaining issues are still appealing at the current Bid levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$374/$384, 1987 1oz-$381/$399, 1/2oz-$190/$200, 1988 1oz-$440/$465, 1/2oz-$196/$210, 1989 1oz-$445/$470, 1/2oz-$227/$255, 1990 1oz-$555/$585, 1/2oz-$350/$390. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$$16.25/$18.50, 1988-$80/$86, 1989-$15/$17.25, 1990-$24.25/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy end sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for e certified specimen due to current merket conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because e dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you mey buy end sell coins through a dealer for e fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 [illegible] However [illegible] will be bag [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must* have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must* have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 but may also include some MS 64 and MS 65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

COLLECTOR MARKET STILL SHINING
GENERIC SUPPORT WEAKENS; SELLS HOLDING

The Market in Depth

Less than two years ago, you could find many dealers asking the rhetorical question, "What collectors?" My how times do change. Today, the question has become "What investors?". To paraphrase a well-known saying, as collectors go, so goes the market. The coins that collectors want and need continue in strong demand—and that especially applies to good-looking specimens. When it comes to putting coins into the collections of true numismatists, sight-unseen is an oxymoron.

Collector coins are holding their own, and this simple truth has not escaped the notice of the dealer community. As additional dealers discover the joys of serving this sometimes unappreciated market segment, there remains the possibility that growing demand may still push prices up – on the better looking pieces, at least. In the meantime, dealer support for many of the generics seems to be weakening. This may be an inevitable result of too many coins and too few dollars. If dealers can hold steady, we may yet see a market bottom—but if enough dealers need to sell their holdings of generics at bargain prices, another round of decreases could be set in motion.

A word about the personal/business relationship that many collectors enjoy with their dealer. First, because the "hobby" of numismatics has been so long perceived as an "investment", it is hard for many advanced collectors to separate the pleasure and profit aspects of their hobby. Certainly, their primary motivation is the pleasure they obtain from increasing their holdings, but they know best of all the many thousands of dollars that they are investing. Collectors, perhaps more than dealers, have a love-hate relationship with the investment aspect of their hobby. They want the coins they need to be available as cheaply as possible, and they want the coins they own to appreciate as much as possible.

This dichotomy of desire can be used as an effective marketing technique in the sale of coins to them. What collector can resist being told that he can now buy a coin for $400 for which the dealer was "foolish" enough to pay $750? The collectors whose business relationship with you has matured into friendship certainly don't want to see you suffer great financial losses (anymore than they want to suffer likewise). But if you, as an expert, liked the coin enough to pay that high a price, surely it adds to the enhanced value of the coin at a most attractive lower level. We may never see generic MS65 Morgans approach $1000 again, but isn't it a lovely piece of history around $110—and doesn't it glow just a little brighter when you think how much it was once worth?

This Week's Market

CENTS THRU HALVES: The BU roll market continues to find buyers for specific issues within each series (at current levels). However, each week also finds a few discounted sellers trying to dispense of various dates which are not on want lists. Thus, the Bids retreat to new lows. A few of the less-active Franklin rolls fell due to this selling pressure, along with some of the (silver) Washington rolls.

DOLLARS: Dollars seem to be the one area where activity is persistent. Despite a few minus signs here and there, the majority of issues (MS-63, 64 & 65) remain on want lists at the current Bids. In this kind of market, dealers have to just be satisfied with the fact that Bids are lingering at current levels.

PROOF SETS AND MINT SETS: In the Proof Set chart, prices are generally stable this week. Most issues are in demand at today's Bids, with a few on the rise. Mint Sets are discovering some minor discounting as a handful of Bids decrease.

COMMEMORATIVES: Just as we announced Commems to be "on firmer ground" last week, they have suddenly weakened once again. Numerous minus signs can be seen throughout the chart as dealers offer assorted issues behind previous Bid levels. Many Commem dealers are simply amazed at how cheap some of these issues have become. Yet, there does not seem to be any extra cash available to take advantage of this situation.

TYPE: There are consistently more sellers around than buyers for Type coins. Very few increases can be found on the charts, whereas declines are prevalent in most areas (Mint State & Proof). One thought to keep in mind here is that the month of July is typically the slowest month of the year as dealers and customers turn to thoughts of vacationing. And the investor. . .?

GOLD: The U.S. Gold chart typifies the mood of the coin market (with the exception of Dollars) at this time. Declines are abundant as sellers try to put themselves into a better cash position. Discounts this week have been the heaviest that we can remember in a long time. For those contrarians with extra cash, now may be the time to pick up some excellent coins at very favorable prices.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$379/$389, 1987 1oz-$386/$404, 1/2oz-$190/$202, 1988 1oz-$440/$470, 1/2oz-$198/$212, 1989 1oz-$445/$475, 1/2oz-$228/$255, 1990 1oz-$555/$590, 1/2oz-$350/$390. The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark - these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

[illegible] Strictly [illegible] However [illegible] It will be [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS 63 - but may also include some MS 60 and MS 65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

ANA STILL SUMMER'S BEACON

CENTENNIAL CELEBRATION TO BE LONG REMEMBERED

The Market in Depth

It is certainly not too soon to be thinking about the American Numismatic Association's spectacular convention and 100-Year Anniversary to be held in Chicago next month. And it certainly is not too late to make plans to attend if you haven't already done so! In fact, we will go so far as to insist that this is one ANA that you simply shouldn't miss, and you should encourage every one of your customers to attend as well!

There are more reasons to attend than can be listed in this limited space, and even mentioning just a few of the highlights will fill the column. To start with, coins are more reasonably-priced and in greater supply now than in many a year, and this ANA's bourse should present some spectacular buying opportunities. Sometimes we say that Cash is King, and other times we say that the Customer is King; either way you want it, come to buy and be prepared to be treated royally.

Numismatists who prefer Auctions will have plenty of opportunities of their own. Auctions by Bowers & Merena will be presenting the official 1891/1991 ANA Centennial Auction (including such spectacular coins as a certified Proof67 High Relief $20 St-Gaudens). There will also be additional sales by Superior Galleries (including the Larry Shepherd Collection of Commemorative coins) and Numismatic Fine Arts.

In addition to the ANA's normally wonderful program of speakers and exhibitions, you can expect some really spectacular events as part of their Centennial celebration. There will be seminars ranging from grading U.S. coins to running Coin Clubs. Speakers are a veritable who's who of American numismatics, with John Ford, Q. David Bowers, John Jay Pittman, Walter Breen, Eric Newman, and many others. If numismatists are interested in it, chances are that there will be a speaker talking about it; right down to the Boy Scout Merit Badge Clinic.

And don't forget the meetings of many specialty organizations, such as the Civil War Token Society, the John Reich Collectors Society, the Society of Paper Money Collectors, the Society for U.S. Commemorative Coins, the Numismatic Literary Guild and numerous others.

The Rosemont/O'Hare Exposition Center, August 10, 1991 through August 18, 1991. See you there!

This Week's Market

CENTS THRU HALVES: This week has produced more discounted sells than we have monitored over the past several weeks. Lower sells were found in the Lincoln series as well as the Roosevelt series. Nonetheless, there remains a vast amount of issues which are wanted at the current Bid levels (in all denominations).

DOLLARS: Even though the Dollar charts contain scattered minus signs, it seems like dealers are still interested in locating specific coins for their customers. They may try to buy the easily obtainable issues at discounts, but if the seller can determine that these issues are on want lists, then he is likely to hold out for a higher Bid. All the while, rare date issues may appear to languish at current levels, however, when they become available, they are actively sought after.

PROOF SETS AND MINT SETS: Plus signs are more prevalent than declines this week in the Proof Set chart. Numerous other issues are needed at Bid levels. Mint Sets are not as active with a few minuses present.

COMMEMORATIVES: The bulk of modifications in the Commem charts (including both Gold and Silver) are slightly downward. Most of the current buyers are attempting to purchase attractive coins at bargain prices. And the longer they wait with money in hand, the more likely that sellers will eventually accept their tight-fisted offers.

TYPE: The Type charts are predominantly covered with minus signs this week as sellers have specific issues available at lowered levels. The few increases can mostly be observed in the copper issues.

GOLD: Despite the fact that the price of gold has risen this past week, it is not having a positive influence on Mint State issues. Several issues have fallen due to discounted selling and many of the declines are substantial. Trades were executed within the new Bid/Ask prices for the MS-64 $5 Indian and the MS-65 $10 Liberty; Bids dropped $1100 and $650, respectively. Other changes were nominal, yet mostly downward.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$381/$391, 1987 1oz-$388/$406, 1/2oz-$191/$203, 1988 1oz-$440/$470, 1/2oz-$198/$214, 1989 1oz-$445/$475, 1/2oz-$229/$255, 1990 1oz-$555/$590, 1/2oz-$355/$390. Proof Silver Eagles are trading at: 1986-$16/$17, 1987-$16.50/$18, 1988-$82/$87, 1989-$15.50/$16.50, 1990-$25/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike with eye appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 (UNCIRCULATED) [illegible] Uncirculated [illegible] However no [illegible] are necessary. [illegible] will be bag [illegible] may [illegible] have [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average [illegible].

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must have eye appeal.*

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

SPECTACULAR COMMEMORATIVES TO CROSS AUCTION BLOCK
MS65 MORGANS HOLDING ABOVE $100

The Market in Depth

We will admit to liking both general numismatic auctions and specialty sales. Generalized auctions present a little of everything under the numismatic sun, with every catalogue being the equivalent of a wide-ranging numismatic education. Specialty sales, on the other hand, present an in-depth education on one narrow topic. Specialty sales also have the advantage of bringing together the leading collectors of that particular series, which usually leads to some very exciting auction sessions.

Specialty sales also have the attraction of allowing us to enjoy the vision, skill, and expertise of the numismatist who assembled it. The Larry Shepherd Collection of U.S. Commemorative coins, to be sold by Superior on August 11 in Rosemont, Illinois (site of the ANA Centennial Convention), gives us that opportunity. If there has been a lot of publicity about this collection, there is good reason.

The 144 pieces are spectacular; each has been certified as MS65 or higher. Of the 144 pieces, 102 are the highest graded by their respective certification service. Many of the coins have populations of three or less. One-half of the set grades MS67 or better. These statistics are impressive, and will insure spirited Bidding, but are only part of the story of what embodies the really impressive qualities of this collection. Any collector of means, perhaps even one who knows nothing about Commemoratives, *could* assemble a set of high-grade pieces; only a true connoisseur could have assembled a *collection* of this caliber.

As we all know, every dealer and every collector has a different set of aesthetic values, and will view each coin differently. Because these are stunning pieces, all will agree generally on their favorable characteristics. But just as beauty is in the eye of the beholder, one bidder may favor one of Shepherd's 200+ duplicates being offered over the piece that Larry picked for his final set. That is what makes life interesting, and that is how the next great collection of Commemoratives will be formed.

This week's market saw light activity, as the "slow summer season", as one dealer put it, continued to work its way towards ANA. Dollars were largely steady, and Type coins showed the most plus activity; these two areas were also the most active in the quiet market. MS65 Morgans have rebounded slightly after a few trades occurred close to the $100 mark. Proof & Mint Sets, which were the stars of the market during the first half of the year, have suddenly reversed.

This Week's Market

CENTS THRU HALVES: The BU roll market is not too revealing this week. There are very few changes, and although there has been a noticeable lack of messages of late, many issues are still in demand at current Bid levels.
DOLLARS: Generally speaking, the Dollar market remains steady. A few plus signs and a few minus signs lead one to think that there is not that much activity; however, the majority of issues (in MS-63, 64, & 65) are in demand at current levels. Most of the time when a dealer offers a better-date Dollar for sale at a discount, it is because he does not have a current customer for this particular issue and he is looking for a quick sale.
PROOF SETS AND MINT SETS: Serious discounting has taken place this past week for Proof and Mint Sets. It is not so much that they are dropping their sell prices by a considerable amount, it is more a matter of the sellers attempting to sell a majority of the later issues (1962 to date Proof & 1968 to date Mint) at less-than previous levels.
COMMEMORATIVES: The Commem market continues to suffer from an over-supply of coins on the market. In order for sales to take place, the seller must make the price more attractive to a potential buyer. This is the well-known **buyer's market** and it gives the buyer the opportunity to search for the best specimen for the money. Eye-appeal is most important at this time.
TYPE: Particular Type coins must be too cheap. Several plus signs are scattered throughout the charts indicating that some dealers are interested in obtaining nice coins at higher levels. This is the case for Proof coins as well as Mint State. Nonetheless, numerous minus signs are still apparent for some issues.
GOLD: Bids for Mint State U.S. Gold continue to decline due to an excessive number of discounted sellers. We are still finding dealers who are willing to sell various issues at healthy discounts, including some of the coins which are less-frequently traded. For example, the $1 Type I in MS-65 and the $5 Lib W/M also in MS-65, both fell substantially this week as a result of radically lower sells.
EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$379/$386, 1987 1oz-$382/$396, 1/2oz-$191/$201, 1988 1oz-$420/$455, 1/2oz-$185/$210, 1989 1oz-$430/$465, 1/2oz-$210/$250, 1990 1oz-$540/$575, 1/2oz-$355/$390. Proof Silver Eagles are trading at: 1986-$16/$17, 1987-$15/$15.75, 1988-$80/$87, 1989-$15/$15.75, 1990-$24/$27. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems!); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU -Far and away nicer than MS-63, yet a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

Our Clients Collect Coins

Not many dealers are willing to make a lifetime commitment to their clients. In fact, **Joel D. Rettew & Son Rare Coin Brokerage** is the only American numismatic firm to make this offer to you:

- We will work for you in a brokerage capacity, which means that we *are on your side* in making money in the numismatic marketplace!
- We can sell your coins *for you* in retail transactions for a 10% commission!
- We will sell coins *to you* at a very conservative mark-up (our average is about 10%)!
- We will give you a FREE statistical analysis of your current portfolio. (Minimum $20,000)

What's in it for us?

- Financially, we will earn 10% of any profits that we assist you in generating for your account.
- More importantly, we want *all* of your coin business *for life*. We want a long-term relationship with you as a customer and as a friend.

There are many reasons why **Joel D. Rettew & Son Rare Coin Brokerage** should be your dealer of choice. MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects Prices of such seldom encountered specimens are based upon the merits of each coin They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins These usually average MS-63, but may also include some MS-60 and MS-65 exam For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this cha a for typical original rolls of each date and mint mark

In Memory of

DEALERS ANXIOUSLY AWAITING ANA
MARKET STILL HIDING SOME REAL STRENGTHS

The Market in Depth

Dealers are anxiously awaiting this year's ANA convention for many reasons. Reason enough would be the ANA's usual signal to the collecting community that the summer doldrums are over; it is time to get serious about buying again! Then too, this ANA promises a much larger crowd as part of the 100-year Anniversary celebration. Add to that the simple argument that there is no better place to go for the buying and selling of coins, and you have an impressive weight of argument for heading to Chicago in August.

The most noticeable characteristic of this week's market is the widening of the Bid/Ask spreads on many issues. Some buying dealers are simply not supporting earlier Bid levels; others do not seem especially anxious to 'tip their hand' to their current levels of desire; others certainly are hoarding their cash for the **sight-seen** Bourse floor at ANA. Whatever the reason, some minus signs are resulting from the decreased levels of support. This week, however, we have not seen as much evidence of sellers dropping their Asks as the Bids lowered. Consequently, there is somewhat less activity as the spreads widen. Historically, sellers holding their ground has often produced an upswing in market prices; there are lots of caveats attached to this observation, but once dealers have their inventory in an equilibrium position that doesn't require liquidation of coins to support cash flow, then Ask prices tend to remain stable.

One encouraging sign that we have seen is usually the result of a dealer having a specific buy order for a coin. You can often spot these as the dealers will aggressively raise Bid in the marketplace above its previous levels. The smart holder of a coin will recognize the sincere effort to buy a coin, and reward it with a sale. In some of the boom markets of the past, aggressive Bidding only resulted in Asks being ratcheted upward as well -- such activity in this market is just a good way to keep coins in inventory. Increasing spreads logically are a temporary phenomena, as it takes buyer and seller meeting somewhere in-between for a sale to occur; and it takes many such sales for a market to be sustained.

The flip-side manner of avoiding ASK ratcheting is for the buying dealer who has time on his side to wait for coins that he wants to come along at reasonable Ask levels, and buy them at those levels. While this is not an especially efficient way to gather needed coins, it has the advantage of secrecy. We are seeing more evidence of Asks being accepted in trades. It remains to be seen whether too much hiding of demand will have an affect on supply.

This Week's Market

CENTS THRU HALVES: Considering the fact that the same dealers continue to run their buy messages (at current Bid levels), it is rather ominous that the majority of Bid changes are to the downside. Like most other series, it is a simple matter of cash flow which creates most of the minus signs.

DOLLARS: Even though Dollars are the mainstay of numismatics, there are still plenty of dealers willing to sell certain issues at discounts of the previous Bids. Meanwhile, this remains a very active market; common issues are steady in MS-63, 64, & 65. And the rare dates have any number of collectors competing for the available supply at prices well in advance of the current Bids.

PROOF SETS AND MINT SETS: Proof and Mint Sets are generally stable this week as the number of changes is minimal--in both directions. After last week's downturn, fewer dealers are willing to discount sets any further.

COMMEMORATIVES: Commems can be found on more selling lists than on buying lists. At current levels, most dealers feel that the market should be rising rather than the opposite. This just serves to point out that there are no certainties in the collectibles arena. The price spreads between grades has merged to a very thin line for several issues.

TYPE: The Type market is not as positive this week as it was last week. There is a minimal number of plus signs, while the declines are much more apparent. The slowness in the overall marketplace and a shortage of cash are the chief causes of the declines.

GOLD: Dealers continue to display a lack of confidence in the gold market. Bullion coins seem to languish in inventory and it is hardly worth the exposure for the amount of money that can be made on each coin. While the Mint State issues allow for more of a spread between the buy and the sell, it does not seem like there is enough interest by the collector to justify keeping a large inventory on hand.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$379/$389, 1987 1oz-$383/$397, 1/2oz-$190/$201, 1988 1oz-$420/$450, 1/2oz-$185/$210, 1989 1oz-$430/$460, 1/2oz-$210/$250, 1990 1oz-$540/$570, 1/2oz-$345/$380. Proof Silver Eagles are trading at: 1986-$16/$17, 1987-$15/$15.75, 1988-$80/$87, 1989-$15/$15.75, 1990-$24.25/$27. BU 1986 Silver Eagles are wholesaling at $13/$13.75.

The weekly COIN DEALER Newsletter (Greysheet) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE**: The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 (UNCIRCULATED) Will be strictly uncirculated [illegible]. However, no [illegible] will be bag [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS 67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 but may also include some MS 60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

NICE COINS, NICE PRICES - NICE PURCHASES
COLLECTIONS GROW ON DISCOUNTED SELLS

The Market in Depth

If it didn't hurt quite so much, this would be a really interesting market; or, to put it another way, if declining inventory values didn't affect us so, we could look more objectively at current events. A couple of things about this market make it especially interesting. First, after many years of having Bid be the dominant factor in determining market value, Asks are becoming increasingly important. Also, while generics seem to be leading the movement downward, discounted sells are now appearing on the upper-end (better-date) coins.

So what are we to make of all this? Declining prices have one positive aspect - they represent buying opportunities for the **contrarian.** Knowing that coin values are cyclical in nature, we expect that additional demand will surface in time; the question is, how much lower will prices need to move to really bring out the latent demand among collectors. Dealers who are busy selling right now, know that replacement costs have dropped as well, so it is better to concentrate on the profits than on the losses. Buying at current levels, we also expect that some coins will rise, some will fall, and some will stay the same in the immediate future. The smart (or lucky) buyer will buy low, and either hold for his long-term inventory appreciation, or sell medium-term when demand is met. That is how money is made in supply/demand marketplaces.

Collectors who have been in the hobby for many years, and who can recognize this phenomena for what it is, are also taking advantage of the situation to add to their collections. For the most part, the collectors already have the generic dates, and are busy accumulating the medium value specimens (where their money buys a really terrific coin right now!). We suspect this is the reason that coins valued between $400 and $2,000 seem to be doing better than average right now. We also suspect that they will find sufficient coins in this price range to keep them occupied for some time, especially if they are following the auction market. Collectors demand coins, and dealers supply them; surely, such a simple scenario should be capable of producing profits.

This Week's Market

CENTS THRU HALVES: In the BU roll charts, numerous minus signs can be found for Mercury Dimes and Walking Liberty Halves. These declines are a result of adjustments due to lower Bid levels of the **singles** in MS-65 and lower grades. The balance of the roll market is mostly steady at today's levels.

DOLLARS: While the majority of the Dollar market is steady at today's Bid levels, occasional sales do take place (for some issues) at discounts. Combined with the withdrawal of Bids for these specific coins, the Bid levels have fallen slightly. Common date Morgans in MS-63 and 64 are active at current levels of $23 and $39, respectively; however, the MS-65s have fallen to $100 Bid. This should be considered a test area which will ultimately determine near-term direction.

PROOF SETS AND MINT SETS: Proof and Mint Sets are generally steady this week, although a few minus signs appear as a consequence of discounted sells; most of the lower sells are occurring in the Proof market.

COMMEMORATIVES: Commems seem to get weaker as the summer days dwindle into August. Many dealers feel that there are a multitude of super-value coins in the marketplace just waiting to be picked-off. However, the potential buyers seem to be waiting a little longer. How much cheaper can Bids retreat? Stay tuned...

TYPE: The Type market is certainly one of the more active areas of the coin market today. There is a healthy mix of increases and decreases throughout the charts and even the issues which did not move this week seem to be in demand. The ANA Convention should be an exciting time for Type coins.

GOLD: This week we have found the U.S. Gold chart to be a little different from last week. While the circulated issues are witnessing some considerable weakness, the Mint State issues are gathering some strength. There are several plus signs within the Mint State columns, in addition to many more issues which are in demand at current levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$378/$$386, 1987 1oz-$381/$395, 1/2oz-$190/$200, 1988 1oz-$410/$455, 1/2oz-$185/$210, 1989 1oz-$420/$465, 1/2oz-$210/$245, 1990 1oz-$530/$570, 1/2oz-$340/$380. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen** The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small but varying percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-6[illegible] PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-6[illegible] but with the addition of [illegible] mirror prooflike surfaces on both sides.

the COIN DEALER newsletter

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 32 August 9, 1991 *. . .a Friday morning report on the Coin Market*

WHERE IS THE RARE COIN MARKET HEADED?

MARKET NOT QUITE AS GLOOMY AS SOME WOULD HAVE IT

The Market in Depth

The direction of the rare coin market is perhaps not quite as important as the more immense question: What is the rare coin market? To most dealers, the rare coin market is all-inclusive; it entails the cheapest of coins all the way up to the most expensive issues. This would include the 25-cent grab bag in the corner coin store, the $100,000+ coin in the most prestigious auction, and everything in-between. Not to mention medals, and tokens, paper money, and a few other related collecting areas.

From what we can interpret from the multitude of dealers with whom we converse, there is very little to worry about with cheap coins; most retail stores have a fairly good following of customers. The problem is that today's cost of living has reached the point that small sales will not pay the overhead in most coin operations. Therefore, it takes a certain level of sales in high value coins, with a sizable mark-up, to offset the overhead and insure just a mediocre profit.

Herein lies the essence of the problem---very few dealers have high-powered customers for higher-priced coins. Furthermore, the spreads have become so narrow that dealers are lucky to make 10% on a $10,000 coin. In fact, it seems that everyone wants to buy at wholesale levels. And this is just not possible in an environment where a dealer must own his inventory and may suffer through the declines of a cyclical market.

No dealer wants to see his customers lose money, but if the customer is using discretionary income, then he can afford to sit and wait for the market to rise so he can make a substantial profit. The dealer cannot afford to sit and wait; if he is running his business according to proper accounting procedures, his coin inventory is where he makes his profits, not by having cash in the bank.

This Week's Market

CENTS THRU HALVES: Activity in the BU roll market was rather sparse this past week. The prominent high Bidders in this area were temporarily absent, therefore, most of the changes were to the downside. War Nickels were hit by discounts as was the 1960-P sm. date Lincoln roll.

DOLLARS: Dollars are more active than they may appear on paper. The minus signs outnumber the increases, although the number of issues which are wanted at their current Bids is sizable. Coins on wants lists for which dealers will pay current levels, along with the issues which have advanced due to higher Bidding, make this a very sought-after series.

PROOF SETS AND MINT SETS: These two charts show a market which appears to have reached an intermediate peak. Minus signs have been the norm the past couple of weeks and this week is conforming as well.

COMMEMORATIVES: The Commem market appears to be more stable this week than the previous couple of months. A few more active buyers have entered the market at today's levels. However, there are but a scant number of buyers who are willing to post Bids in advance of the market in order to acquire fresh coins. In addition, discounted sells still materialize when cash needs to be raised.

TYPE: Type coins continue to display a vital aggregate of the numismatic market. Albeit, the majority of Bid changes are declines, many dealers are trying to pick up specific pieces for their clients at these lower levels. There should be a lot of activity in Chicago, at the ANA---which way will the market shift?

GOLD: Despite lower gold bullion prices this week, Mint State issues appear to be on a more solid footing. In many cases, prices have fallen substantially over the last several months and some dealers feel they have reached a level where they can be supported. Many dealers are hopeful that this is a turning point in the gold market and prices will generally hold at these levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$370/$378, 1987 1oz-$374/$382, 1/2oz-$199/$200, 1988 1oz-$400/$445, 1/2oz-$180/$210, 1989 1oz-$410/$460, 1/2oz-$205/$240, 1990 1oz-$520/$570, 1/2oz-$330/$375. Proof Silver Eagles are trading at: 1986-$15.50/$16.50, 1987- $14.75/$15.75, 1988-$78/$86, 1989-$14.75/$15.75, 1990-$24/$27. BU 1986 Silver Eagles are wholesaling at $12/$12.75.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Supplement, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. Prices represent sight unseen Bids. The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark–these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices–particularly the pre-1941 issues. Washington rolls–dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] bag marks, may show only a slight weakness of strike. [illegible] have full lustre. These are well above average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

Our 29th year...

Single copy price $3.50 Vol. XXIX No. 33 August 16, 1991 *...a Friday morning report on the Coin Market*

100 YEARS, 100,000 MEMORIES
100,000+ = ONE LAFAYETTE

The Market in Depth

Well, it took 100 years to arrive, but it's finally here - the *100th Anniversary* of the **American Numismatic Association**. The major dealers from across the country are in Chicago this week, hoping that business will steadily increase through the final weekend. Even with the many celebratory events planned, dealers and collectors are making time for some 'good old' coin trading.

The celebration started off with a real "bang" with the pre-convention 'piggy-back' auction of the **Larry Shepherd Collection of U.S. Commemorative Coinage**. Only someone who has devoted countless hours to assembling a world class collection could understand the mixed emotions of seeing it auctioned, but Shepherd expressed himself as extremely pleased with the results. Prices were very strong, and the 150+ floor bidders simply stole the battle from the book. The 144-piece set yielded more than **$850,000**, but, according to Shepherd, perhaps most pleasing was the knowledge that most of the coins were being sold to collectors who were working on their own great collections. The strength of the action was sometimes formidable. The Isabella, in MS68, opened at $22,500 before being hammered at **$63,250**. The Lafayette in MS67 opened at $37,500 before soaring to **$115,500**! The Antietam in MS68, which just may have been Shepherd's favorite coin, realized $14,850.

Despite the relative quiet in the recent market, the strong showing of the Shepherd coins is helping create an upbeat mood for the ANA. Initial Convention reports are in line with recent predictions: Trading is somewhat active, although not a barn-burner; prices are somewhat sporadic; there are some discounted bargains available from 'hungry' sellers. Dealers are interested in viewing the abundant high-quality coins available and negotiating before making any decisions; the strength of the negotiations seems to be largely determined by the "look" of the coin, its rarity, and the strength of the Want List (the certainty of the customer). Dealers who arrived well-armed with Want Lists may have the time of their lives, and a few are quietly buying material for their own accounts, especially when available at a discount. Demand seems especially strong for high-quality circulated specimens, as collectors are taking advantage of depressed prices to pick up splendid coins whose only drawback is some evidence of honest circulation. It just may be that the tone of this anniversary celebration, the whole idea of *remembering* when the coin "business" involved dealers inspecting and haggling, may remind them how their livelihood prospered.

This Week's Market

CENTS THRU HALVES: Weeks with major conventions are normally very slow on the teletype systems, especially so in the BU roll market. This week is following that pattern as trading is quite slow. However, there are a few dealers willing to pay current Bids for specific items in limited quantities.

DOLLARS: Although common (MS63, 64 & 65) Dollars remain mostly steady in today's market, it appears that some of the 'not so common' Dollars are inching their way up slightly. If these can hold firm, it could be a stage which precedes advances for other issues. While this sounds good for the market, it is not without some despair. Several minus signs still cover the MS65 column.

PROOF SETS AND MINT SETS: Most Proof and Mint Sets are stable at today's levels; many issues are on want lists at current Bids. There are even a few plus signs in the Mint Set chart.

COMMEMORATIVES: The number of Bid changes in the Commem chart is commensurate with the last several weeks. A few plus signs and a few minuses keep this series moving, although, most of the activity is still to the downside.

TYPE: Type coins should be one of the most active areas at the ANA this week in Chicago. The Type charts are spotted with changes, about evenly divided between increases and decreases. Many dealers have recently reported that they have active want lists for properly graded Type coins.

GOLD: Mint State U.S. Gold continues to trade in a positive vein. Bids may not be moving up much, but they are active at somewhat higher levels. We have even noticed a few transactions which have taken place at about 20% over current bids for single items on want lists. These are usually less-frequently traded issues.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz- $371.50/$380, 1987 1oz-$373/$383, 1/2oz-$184/$200, 1988 1oz-$380/$440, 1/2oz-$185/$205, 1989 1oz-$395/$455, 1/2oz-$190/$235, 1990 1oz-$510/$565, 1/2oz-$325/$375. Proof Silver Eagles are trading at: 1986-$15.25/$16.50, 1987-$14.50/$15.75, 1988-$77/$85, 1989-$14.50/$15.75, 1990-$23.50/$27. BU 1986 Silver Eagles wholesale at $11.75/$12.50.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.
